SUMMARY

Passionate and results-driven **Software Engineer** with hands-on experience in **Software Development, Cloud Computing, Artificial Intelligence, Machine Learning, Backend Development, and Full Stack Web Development** through professional experience, real-world client projects, and academic implementations. Experienced in developing scalable applications using **Python, Java, Node.js, React, Flask, REST APIs, and MongoDB**, while applying **Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Problem Solving, Data Structures, and Algorithms** to build efficient software solutions. Skilled in working with **Amazon Web Services (AWS), Docker, Jenkins, Kubernetes, CI/CD, Cloud-Native Architecture, Git, Linux, and Prompt Engineering** to develop cloud-ready applications and AI-powered solutions. Strong experience in building and maintaining production websites, integrating APIs, automating deployment pipelines, and developing intelligent software applications with a passion for continuous learning and modern software engineering practices.

SKILLS

Software Development

Software Development, Object-Oriented Programming (OOP), Problem Solving, Data Structures, Algorithms, Software Development Life Cycle (SDLC), Application Development, Debugging & Troubleshooting, Design Patterns, Code Optimization

Backend & Full Stack Development

Backend Development, Full Stack Development, REST API Development, API Integration, JSON Processing, Responsive Web Development, Web Application Development, Authentication & Authorization, MVC Architecture

Cloud & DevOps

Cloud Computing, Amazon Web Services (AWS), Cloud-Native Architecture, Docker, Containerization, Kubernetes, Continuous Integration & Continuous Deployment (CI/CD), Infrastructure Automation, Deployment Pipelines, Cloud Security

Artificial Intelligence & Machine Learning

Artificial Intelligence, Machine Learning, Prompt Engineering, Large Language Models (LLM), Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), PyTorch, Hugging Face, LangChain

Testing & Software Quality

Software Testing, Automation Testing, API Testing, Functional Testing, Test Automation, Quality Assurance, Performance Optimization

Professional Skills

Analytical Thinking, Communication, Leadership, Problem Solving, Team Collaboration, Time Management, Strategic Planning, Continuous Learning

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C#, JavaScript, SQL, HTML5, CSS3

Frontend Technologies: React, Tailwind CSS, Flutter

Backend Frameworks: Node.js, Flask, .NET

Databases: MongoDB, MySQL

Cloud Platforms: Amazon Web Services (AWS), EC2, S3, IAM, VPC, CloudFormation, CloudWatch, Lambda, Auto Scaling, CodeDeploy

DevOps & Containerization: Docker, Kubernetes, Jenkins, CI/CD

AI & Machine Learning: LangChain, Ollama, PyTorch, Hugging Face, Prompt Engineering

Testing Tools: Selenium WebDriver, TestNG, Katalon Studio

Development Tools: Git, Linux, Unity, WordPress, Elementor, Divi

EXPERIENCE

Freelance Web Developer

Self-Employed | Remote

December 2025 - May 2026

- **Developed** and **maintained** the official **college website**, enhancing website performance, content management, and overall user experience.
- **Designed** and **developed** a responsive website for **Native Coco**, a food and beverages brand based in Bengaluru, aligning the website with brand identity and business objectives.
- **Built** an additional commercial website for a Bengaluru-based drinks brand, focusing on responsive design, usability, and optimized customer experience.
- **Collaborated** with stakeholders to gather business requirements, implement requested features, and deliver websites within project timelines.
- **Optimized** website performance, navigation, and responsiveness to improve accessibility across desktop and mobile devices.
- **Applied** modern web development practices, content management techniques, and testing to ensure reliable website performance.

Junior Web Developer

Docking Station Pvt. Ltd.

February 2024 - February 2025, Technopark, Trivandrum, Kerala

- **Developed** responsive client websites using **HTML, WordPress, Elementor, and Divi**, ensuring modern user interfaces and improved user experience.
- **Built** and maintained production-ready web applications while implementing responsive layouts and optimizing website performance.
- **Integrated** third-party **REST APIs**, plugins, and business tools to automate workflows and extend application functionality.
- **Collaborated** with cross-functional teams following **Agile Development** methodologies to deliver high-quality software solutions within project timelines.
- **Utilized** **Git**-based version control and participated in deployment activities supporting efficient software release management.

PROJECT

Secure Health API

Python | Docker | Jenkins

- **Designed** and developed a secure **REST API** for health record management using **Python**.
- **Containerized** the application using **Docker** to ensure consistent deployment environments.
- **Implemented** a **Jenkins CI/CD Pipeline** for automated build and deployment.
- **Applied** **Cloud-Native Architecture** principles including stateless services and environment-based configurations.

- **Performed** API testing and documentation to ensure reliability and maintainability.
- **Improved** deployment efficiency using automation and modern DevOps practices.

Course Service – AWS Cloud Practice Project

AWS | Docker | Jenkins

- **Developed** a cloud practice project demonstrating core **AWS** architecture and deployment workflows.
- **Provisioned** EC2, S3, IAM, VPC, CloudWatch, Lambda, and Auto Scaling services.
- **Implemented** CloudFormation templates to automate cloud infrastructure deployment.
- **Configured** Jenkins CI/CD pipelines integrated with **AWS CodeDeploy**.
- **Applied** cloud security best practices through IAM roles and policy management.
- **Strengthened** practical knowledge of cloud-native application deployment.

Chat with PDF – AI-Powered Document Q&A

Python | LangChain | LLM | REST API

- **Developed** an AI-powered document question-answering system using **Python** and **LLM** technologies.
- **Integrated** LangChain and Retrieval-Augmented Generation (**RAG**) techniques for contextual responses.
- **Designed** RESTful backend APIs to process document uploads and user queries.
- **Implemented** intelligent document retrieval and semantic search capabilities.
- **Enhanced** user experience through efficient AI-powered interactions.
- **Documented** project architecture and API workflows.

Plagiarism Checker – AI Model

Python | NLP | REST API

- **Developed** an AI-powered plagiarism detection application using **Python** and **Natural Language Processing (NLP)** techniques.
- **Implemented** semantic similarity analysis using document embeddings.
- **Designed** configurable plagiarism detection thresholds for improved flexibility.
- **Developed** REST APIs for document submission and plagiarism analysis.
- **Optimized** model accuracy through feature engineering and testing.
- **Documented** implementation methodology and technical architecture.

EDUCATION

Master of Computer Applications (MCA)-Pursuing

LEAD College (Autonomous), Palakkad • Kerala, India

Bachelor of Science in Computer Science (B.Sc. Computer Science)

University of Kerala • Kerala, India • 2024

CERTIFICATIONS

Industry Project Certificate – Tata Consultancy Services (TCS)

NCC 'A' Certificate – National Cadet Corps

ACHIEVEMENTS

Redesigned and maintained the official college website, improving performance and user experience.

Developed commercial websites for Bengaluru-based food and beverage brands, delivering responsive and user-focused solutions.

Built multiple AI-powered, cloud-native, and full-stack applications demonstrating practical software engineering skills.

Implemented AWS cloud services, Docker containerization, and CI/CD pipelines through hands-on projects.

Applied Retrieval-Augmented Generation (RAG) and LLM technologies to develop intelligent document-processing applications.
